

Understanding and Affecting Behaviour

This is a one-day course that is designed to meet the needs of Teachers, Teacher Aides and other educators. The outcomes align with the Competency Matrix and participants will benefit from evidence-based workshops with practical exercises.

LEARNING OUTCOMES

- Understand behaviour (including possible drivers) and address expressions of distress and challenging behaviour
- Understand theories around behaviour and support emotionally healthy behaviours and practices
- Understand and support the implementation of behaviour programmes
- Know how to de-escalate and defuse situations involving learners and/or adults

MODULES

Each training module will ensure that teacher aides are:

Engaging and Motivating Learners

- Understanding theories and principles of motivation and engagement
- Developing tools for engaging learners

Developing a Growth Mindset

- Developing Growth Mindset for learners
- Understanding correct and incorrect applications of Growth Mindset

Building Resilience & Grit

- Understanding correct definitions and examples of resilience and grit
- Developing a practice that supports resilience in learners

Managing Difficult Situations

- Responding to learners in times of conflict and high emotionality
- Supporting learning and the restoration of relationships after challenging situations

Trauma Responsive Practice

- Understand underlying causes of behaviour that are affected by trauma
- Develop trauma-informed strategies for supporting learners

Culture & Behaviour

- Understand how culture can influence learner behaviour, especially in Māori and Pacific ākonga
- Build tools for developing positive learning behaviours for priority learners

"The struggle you're in today is developing the strength you need for tomorrow."
