EDconnect ScriboLearning

The EDconnect / Scribo Teacher Pathway

Two complementary full-day courses. One powerful journey.

Better writing outcomes for students. Stronger teaching capability for teachers.

DAY 1

SCRIBO STARTER

Starting well with Scribo — and the teaching that makes it work.

Full-day course | Primary & Secondary versions

A practical introduction for teachers beginning their Scribo journey. Learn the key features of the platform while developing the pedagogical knowledge needed to use Scribo purposefully within effective writing instruction.

The focus is not simply on learning the technology. Teachers explore effective feedback, curriculum — aligned planning, scaffolding, gradual release and deliberate teaching — with the teacher remaining in control of instructional decisions.

TEACHERS WILL BE ABLE TO:

- Build confidence using Scribo in classroom practice
- Connect Scribo with effective writing pedagogy
- Strengthen explicit teaching, feedback and the writing process
- Use student writing evidence to identify next teaching steps
- Support students to become increasingly independent writers

FROM USING SCRIBO → TO USING SCRIBO DELIBERATELY

Once the foundations are in place, the learning moves from understanding the tool to using evidence and pedagogy to strengthen impact.

DAY 2

BUILDING ON SCRIBO

Once the foundations are in place, the learning moves from understanding the tool to using evidence and pedagogy to strengthen impact.

Full-day course | Primary & Secondary versions

For teachers already using Scribo who are ready to go deeper. Explore what the evidence is showing, what learners need next and how Scribo can support increasingly deliberate and responsive writing instruction.

The technology can provide feedback, evidence and insights. The teacher decides what those insights mean, what needs to be taught next and how learning should be supported.

TEACHERS WILL BE ABLE TO:

- Use Scribo insights to identify next teaching steps
- Design focused writing activities around learner need
- Use scaffolds, models and feedback more deliberately
- Use reports, class analysis and Claro Foresight to identify patterns
- Strengthen explicit teaching, differentiation and checking for understanding
- Plan how to deepen and embed effective practice across the classroom or school

PEDAGOGY IS THE DRIVER. TECHNOLOGY IS THE ACCELERATOR.

Scribo provides the tool, feedback and evidence. EDconnect professional learning builds the teacher capability to turn these into better teaching and improved writing outcomes.

Better writing outcomes for students | Stronger teaching capability for teachers | Stronger impact for schools

Scribo Next Steps

Targeted professional learning — when you need it, where you need it

Once your school is confidently using Scribo, professional learning becomes much more responsive. Schools can come to a scheduled online session or request a tailored online session for their own school.

Come to us —

join a scheduled online focused session

Bring us to you —

request a tailored online session for your school

Choose the focus —

data, feedback, conferencing, planning, moderation, AI and authorship, monitoring progress, or another emerging need

Stay current —

regular updates on new Scribo features, developments, resources and opportunities

Working toward Scribo Schools of Excellence:

Schools that demonstrate strong, sustained and purposeful use of Scribo can work toward joining a developing Scribo Schools of Excellence network.

- Early trials of new features
- Pilot opportunities
- Advanced professional learning
- Direct feedback opportunities
- Shared practice with other leading Scribo Schools
- First access to new resources and developments

Scribo for Leaders

Using evidence to lead improvement

Two focused half-day online sessions for school leaders. The emphasis is on understanding Scribo, overseeing implementation, identifying good practice, using evidence, moderation, determining progress to goals, reporting needs, and deciding next steps

PART 1 – UNDERSTANDING SCRIBO & SETTING DIRECTION

Know what to look for. Understand what good practice looks like. Set the direction.

Half-day online

☑ Understand the key components of Scribo, what information is available and what leaders should expect to see as implementation develops

☑ Administer and oversee Scribo at school level, including how to view activity, participation, use and progress across classes and cohorts

☑ Identify the features of effective Scribo practice and recognise where use may need strengthening or greater consistency

☑ Interpret trends and patterns in the evidence, then use these to establish writing priorities, goals and measures of progress

Approximately 6 months later

PART 2 – EVIDENCE TO IMPACT

Measure progress. Moderate judgements. Report what matters.

Half-day online

☑ Determine progress against agreed goals and identify where acceleration is occurring

☑ Use Scribo evidence alongside teacher judgement to support moderation and consistency

☑ Evaluate the impact of teaching, interventions and implementation across the school

☑ Turn the evidence into clear reporting for Boards, communities and future planning

FROM DATA → TO JUDGEMENT → TO ACTION → TO REPORTING

EDconnect

New Zealand's approved Scribo professional learning pathway — delivered by Scribo-qualified EDconnect facilitators.
